WORK CAPACITY CERTIFICATE

Workers' Compensation Scheme (fictional)
Certificate no. WC-1144

Worker details

Worker name	Date of birth	Claim no.
Daniel James Marsh	14/03/1984	UI-22-0815-4471
Employer	**Occupation**	
Brightline Logistics Pty Ltd	Storeperson / forklift operator	

Certificate type

☐ Initial ☑ Progress ☐ Final

Clinical details

Date of injury	Date of examination	First seen at this practice
08/08/2022	22/11/2022	09/08/2022

Diagnosis / injury

Status post left L4/5 microdiscectomy (15/11/2022)

☑ The injury is consistent with the worker's description of how it occurred

Capacity for work

☐ Full capacity for pre-injury duties

☐ Some capacity for work (complete restrictions below)

☑ No current capacity for any work

From	To
22/11/2022	20/12/2022

Restrictions / suitable duties

Hours per day	Days per week

Treatment plan / referrals

Post L4/5 microdiscectomy 15/11/2022. Wound healed. Gentle walking program.

RE: DANIEL JAMES MARSH — DOB 14/03/1984
Claim number: UI-22-0815-4471 · Date of injury: 08/08/2022

Dear Anil,

I reviewed Daniel today, four weeks after a left L4/5 microdiscectomy on 15 November 2022.

His left leg pain has resolved. He has residual low back stiffness, worse in the mornings (3/10), and mild numbness over the dorsum of the left foot which is improving. The wound has healed well. Straight leg raise is now 80 degrees bilaterally and power is full.

He can now commence a graded rehabilitation program with physiotherapy and an exercise physiologist. I would anticipate a graded return to suitable duties from early February 2023, initially 4 hours per day, with no lifting over 5 kg and no forklift driving.

I will see him again in three months.

Yours sincerely,

M. Reid

Physiotherapy Progress Report

Patient	Daniel James Marsh
Date of birth	14/03/1984
Claim number	UI-22-0815-4471
Date of report	17/01/2023

Treatment to date

Mr Marsh attended 13 sessions between 15/08/2022 and 27/10/2022 for left L5 radicular pain, then resumed physiotherapy two weeks after a left L4/5 microdiscectomy (15/11/2022). He has attended 5 post-operative sessions.

Current status

Leg pain has resolved. Low back pain 2–3/10 with morning stiffness. Sitting tolerance 40 minutes; walking 30 minutes; standing 30 minutes. Lumbar flexion to fingertips at ankles with end-range discomfort. Neurological examination is normal.

Outcome measures

Measure	15/08/2022	17/01/2023
Oswestry Disability Index	56%	24%
Back pain (NRS)	6/10	2–3/10
Leg pain (NRS)	7/10	0/10
Patient-Specific Functional Scale	2.3/10	6.0/10

Treatment provided

Pre-operative treatment focused on education, positions of relief, neural mobility, a graded walking program and soft tissue techniques. Post-operative treatment has focused on wound protection, walking, transversus abdominis and multifidus activation, hip hinge retraining and graded sitting tolerance. He has also attended weekly hydrotherapy since 06/01/2023.

Phase	Sessions	Main interventions
Pre-op (15/08 – 27/10/2022)	13	Education, walking, neural glides, STM
Post-op (02/12/2022 – 13/01/2023)	5	Walking, motor control, ROM, hip hinge
Hydrotherapy (from 06/01/2023)	2	Aquatic walking, core, squats

Goals

Goal	Status
Walk 30 minutes continuously	Achieved
Sit 45 minutes (car trip to in-laws)	Nearly achieved (40 min)
Lift laundry basket (5 kg) from floor	Achieved with hip hinge
Return to work, light duties	Planned February 2023
Return to touch football	Not yet appropriate

IRON STUDIES

Test	Result	Units	Reference range	Flag
Iron	7	umol/L	5 – 30	
Transferrin	3.6	g/L	2.0 – 3.6	
Transferrin saturation	9	%	15 – 45	L
Ferritin	11	ug/L	30 – 300	L

FULL BLOOD COUNT

Test	Result	Units	Reference range	Flag
Haemoglobin	116	g/L	115 – 165	
MCV	79	fL	80 – 100	L
White cell count	5.9	x10^9/L	4.0 – 11.0	
Platelets	301	x10^9/L	150 – 400	

Comment: Iron deficiency. Suggest clinical correlation.

Authorised by: Dr Imogen Hale, Pathologist. Results relate only to the specimen received. NATA accredited laboratory (fictional).

Continue weekly physiotherapy for 6 weeks and commence an exercise physiology program (2x/week) focusing on graded lifting and conditioning. He is suitable for a graded return to suitable duties from February 2023: 4 hours per day, 3 days per week, lifting up to 5 kg waist level, no forklift driving.
